

CCS 222 - WEB DESIGN AND DEVELOPMENT

Build a Website for a Local Iloilo Business

5-Page Static Website Development Project

Activity Overview

For this activity, you will act as a web developer hired to create a website for a real business in Iloilo. Your task is to identify an existing business in Iloilo City or Iloilo Province that does not currently have its own website and design and develop a 5-page static website for that business.

The purpose of this project is not simply to demonstrate that you can write HTML and CSS.

You must demonstrate that you can research a real client, understand its business, plan appropriate content, and translate that into a functional and visually consistent website.

Submission Date: September 9, 2026

Part 1 — Find a Real Business

Find ONE real business located in Iloilo.

- Be an existing business.
- Be located in Iloilo City or Iloilo Province.
- Have a legitimate business presence.
- NOT currently have its own official website.
- Ideally have a Facebook page, social-media account, Google Maps listing, or other online presence.

Possible business types include:

1. Restaurant or café
2. Bakery or food business
3. Barbershop or salon
4. Local retailer
5. Hotel/inn
6. Tourism-related business
7. Repair shop
8. Printing business
9. Construction/service provider
10. Other legitimate local business

Important: If the business already has an official website, you cannot use it for this project. A Facebook page is NOT considered an official website.

Part 2 — Business Verification

Before starting the website, verify that your chosen business does not have its own website, Your team needs to know the following:

- Business Name
- Business Type
- Location
- Facebook/Social Media
- Contact Number (If Applicable)

You may use Google Search, Google Maps, Facebook, business directories, or other reliable sources.

Part 3 — Create a 5-Page Website

Your website must contain exactly five main pages:

- 1. Home
- 2. About Us
- 3. Products / Services
- 4. Gallery
- 5. Contact Us

Page names may be adjusted slightly depending on the business. For example, a restaurant may use Home, About Us, Menu, Gallery, and Contact Us.

PAGE 1 — HOME

The Home page should serve as the landing page of the business website.

Required elements:

- Business name/logo
- Navigation menu
- At least 2 images
- Background design
- Short introduction
- Call-to-action button or link
- Sidebar
- Footer
- Links to the other four pages

PAGE 2 — ABOUT US

Provide detailed information about the business.

- Business history/background (You may use AI for now to generate the content or text)
- At least 3–5 paragraphs

- At least 1 image integrated within or alongside the text
- Mission, vision, values, or equivalent information (You may use AI for now to generate the content or text)
- Navigation and footer

PAGE 3 — PRODUCTS / SERVICES

Showcase what the business actually offers. Adapt the page to the type of business.

- At least 5 products/services
- Images where appropriate (You may use AI to generate the content or image, none are found online)
- Name and description
- Price or other relevant information where available
- Proper layout
- Navigation and footer

You may use cards, tables, lists, product/service sections, and buttons where appropriate.

PAGE 4 — GALLERY

Create a dedicated visual gallery for the business.

- At least 8 images
- Organized gallery layout
- Captions or descriptions where appropriate
- Consistent image sizing
- Navigation and footer

Images may include the business exterior/interior, products, services, staff, food, location, equipment, or other relevant photographs. Make sure you have permission to use photographs when necessary but if not you may use AI to generate a placeholder image.

PAGE 5 — CONTACT US

Create a professional-looking contact/inquiry form demonstrating different HTML form controls.

Form Element	Required
Full Name (First name and Last Name) – text	✓
Email – email	✓
Phone – tel	✓
Password – password	✓
Age/Number – number	✓
Date – date	✓
Time – time	✓
Radio Buttons	✓
Checkboxes	✓
Dropdown/Select	✓
Textarea	✓
File Upload	✓
Submit Button	✓
Reset Button	✓

The form does not need a backend or database. The goal is to demonstrate your ability to construct and style different HTML form elements.

Required Website Structure

A recommended project structure is:

```
BusinessWebsite/  
├─ index.html  
├─ about.html  
├─ services.html  
├─ gallery.html  
├─ contact.html  
├─ css/style.css  
├─ images/  
└─ README.txt (Should consist details about your site)
```

HTML & CSS Requirements

HTML should demonstrate:

- Proper document structure
- Headings and paragraphs
- Links
- Images
- Lists
- Tables where appropriate
- Forms and input types
- Semantic HTML such as header, nav, main, section, article, aside, and footer

CSS should demonstrate:

- Selectors
- Colors
- Typography
- Backgrounds
- Margins and padding
- Borders
- Width/height
- Positioning
- Form styling
- Image styling
- Navigation styling

IMPORTANT — AI AND COPIED CODE

I will be checking your code.

This is not an activity where you can simply ask an AI to “Create a 5-page website for a business in Iloilo” and submit whatever it produces.

I can inspect your:

- HTML
- CSS
- File organization
- Naming conventions
- Layout decisions
- Code structure
- Consistency between pages

I may also ask you to explain your own code and design decisions. If you cannot explain the code you submitted, that is a problem. Using AI as a learning/reference tool is different from having AI produce the entire project and submitting it without understanding it.

You are responsible for every line of code you submit.

The goal of this activity is for you to learn Web Design and Development, not simply to produce a website.

Submission Requirements

Submit the following:

1. Complete website folder containing all HTML, CSS, and image files.
2. Business research containing the business details and evidence that it has no official website.
3. Short explanation answering the questions below.

Short Explanation Questions:

1. Why did you choose this business?
2. Who is the target audience of the website?
3. What design choices did you make?
4. What problems does your website solve for the business?
5. What part of the website are you most proud of?
6. What part did you find most difficult?

Final Submission Checklist

- ☐ Home page works
- ☐ About Us page works
- ☐ Products/Services page works
- ☐ Gallery page works
- ☐ Contact Us page works
- ☐ Navigation works on all pages
- ☐ Images display correctly
- ☐ CSS is properly linked
- ☐ Home has a sidebar and background
- ☐ About Us has sufficient text and integrated image
- ☐ Contact form contains all required input types
- ☐ Submit and Reset buttons are present
- ☐ No broken links
- ☐ No broken images

Performance Guide

90–100 — Excellent: Complete, functional, visually appealing, well-structured, and demonstrates strong understanding of HTML/CSS.

80–89 — Very Good: Complete and functional with minor design, structure, or implementation issues.

75–79 — Satisfactory: Most requirements are present but several elements need improvement.

60–74 — Needs Improvement: Multiple requirements are missing or the website has significant functionality/design issues.

Below 60 — Incomplete: Major portions of the required website are missing or non-functional.
