

Submission Requirements Von Cedric C. Santotome

1. Complete website folder containing all HTML, CSS, and image files.

See Files Attached.

2. Business research containing the business details and evidence that it has no official website.

JoshWorks is a DTI-accredited business based in Iloilo. It already has social media accounts. As a way to contact them is thru Personal messages in Instagram or Facebook. This business is focused on accepting graphic design commissions to tailor clients' vision. Despite growing social media presence, JoshWorks still does not have an existing official website (According to Joshua David Ranin – Founder of JoshWorks) they accept commissions through their social media pages via private message.

3. Short explanation answering the questions below.

Short Explanation Questions:

1. Why did you choose this business?

We chose this business in order to support local graphic designers who are still growing. We believe that making this website will improve our skills in frontend development for now and give Joshworks and other small local businesses an idea to scale their businesses through a website to be easily accessed by people. And by having this website is also a way to see what kind of business it is to design without limit and can fully express what they only want to see.

2. Who is the target audience of the website?

The main target audience of Joshworks website is to let people know that there is a way to easily contact the people within the business and without the hassle of going through their facebook profile asking questions. The main target audience of the business Joshworks itself are business owners who want to improve their presence by requesting to make merchandise that is visually pleasing and aesthetic with captivating designs, the requests vary from small organizations, students and small business owners.

3. What design choices did you make?

We made a website with a simple premise but have a captivating design with a bit of playfulness as this motif aligns with the branding of Joshworks by sticking to its branding we can create a familiarity that can be easily be recognized.

4. What problems does your website solve for the business?

The solutions we will be providing by creating this websites is to make the business more flexible and scalable. Websites are flexible since you can freely do whatever you want with the right resources, which is a break through from social media limitations. It also makes the business scalable since having a website means more ways of connecting with people.

The problems that we can solve by making website is to make our local and small businesses to have a simple way to be requested or queried, as these website can make them more flexible.

5. What part of the website are you most proud of?

The things that we are mostly proud on is that this work made us to have better teamwork and improve our skills in frontend development.

6. What part did you find most difficult?

The major hassle was organizing files and time management.
